PROFESSIONAL SUMMARY

Senior Fullstack Developer and Frontend Leader with 5+ years of experience building scalable web applications. Proven expertise modernizing legacy codebases, architecting complex systems, and leading high-performing engineering teams. Skilled in React, C#/.NET, and Vue. Experienced in delivering mission-critical features on tight timelines with cloud platforms including Azure and AWS.

PROFESSIONAL EXPERIENCE

NORWEGIAN MARITIME AUTHORITY | Haugesund, Norway

Frontend Lead | May 2026 - Present

- Lead frontend engineering team of 10+ developers establishing engineering standards, architecture patterns, and CI/CD infrastructure
- Architected component library and testing frameworks to standardize code quality and accelerate development velocity
- Made technical decisions on architecture, tooling, and best practices for regulatory and compliance systems
- Technologies: React, TypeScript, Tailwind CSS, HTML5, CSS3, Jest, RESTful APIs, Azure

NORWEGIAN MARITIME AUTHORITY | Haugesund, Norway

Senior Fullstack Developer | Oct 2024 - Apr 2026

- Architected and implemented regulatory compliance solution for international requirements
- Modernized legacy systems using React and C#/.NET, improving performance and maintainability
- Collaborated with cross-functional teams to deliver features on regulatory timelines
- Technologies: React, TypeScript, C#, .NET, SQL Server, Azure, RESTful APIs

APPEX | Haugesund, Norway

System Developer | Oct 2021 - Sep 2024

- Built and maintained full-stack applications using C#, React, Nuxt.js, and Microsoft Azure for international transport company
- Refactored multiple legacy codebases improving performance, scalability, and developer productivity
- Mentored junior developers to improve code quality and knowledge sharing across remote teams
- Technologies: C#, .NET, React, Vue, Nuxt.js, Tailwind CSS, Microsoft Azure, MSSQL, Node.js, GraphQL

LABOR DRIVEN | Duluth, MN, USA

React Developer (Contract) | May 2021 - Sep 2021

- Compiled data from multiple legacy sources and created unified API for development of additional systems
- Developed frontend features for employment platform serving international union workers
- Collaborated with design team to implement high-fidelity wireframes
- Technologies: React, JavaScript, MySQL, Node.js, REST APIs

ASTON TECHNOLOGIES | Saint Louis Park, MN, USA

Web Developer | Feb 2021 - Apr 2021

- Developed comprehensive Human Resources application for employee, department, and company vehicle record management
- Collaborated with developers to troubleshoot issues and ensure quality deliverables
- Technologies: Java, Spring Boot, Angular, JavaScript, Maven, MSSQL, MySQL

YOUROK CORP | Remote

Software Engineer (Internship) | Dec 2020 - Feb 2021

- Refactored marketing website for mobile responsiveness, resulting in 2x traffic increase
- Built secure user portal with encrypted front-end to database connections
- Collaborated with team to integrate AWS infrastructure
- Technologies: JavaScript, React, AWS

INDEPENDENT CONTRACTOR | Remote

JavaScript Developer | May 2020 - Oct 2020

- Built front-end JavaScript user interactions and database architecture for financial reporting application
- Developed reporting and auditing features for client's financial team
- Technologies: JavaScript, Node.js, MySQL

ETHAN ALLEN | Edina, Minnesota

Operations Administrator | Apr 2012 - Feb 2020

- Managed profitability and order accuracy for team of 15 design consultants and support staff
- Rolled out new technologies, developed training programs, and onboarded staff across organization
- Created job-specific training documentation that accelerated staff revenue generation
- Provided technical support to Midwest US region

O'REILLY AUTO PARTS | Kansas City, MO & Brooklyn Park, MN

Distribution Center Operator | Apr 2011 - Jun 2012

- Pulled and prepared shipments for distribution across central plains region, ensuring timely fulfillment to stores
- Maintained inventory accuracy through nightly manifest reviews and RF scanner verification systems

- Served on Safety Committee, implementing safety policies that reduced incident rates by 15%

TECHNICAL SKILLS

Frontend Technologies: React, Vue.js, Nuxt.js, TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, JavaScript, jQuery, Angular, Progressive Web Applications (PWA), Accessibility (WCAG)

Backend Technologies: C#, .NET, Java, Spring Boot, Node.js, Express.js, GraphQL, HotChocolate, RESTful APIs

Databases: MSSQL, MySQL, Sequelize, NoSQL

Cloud and DevOps: Microsoft Azure, AWS, Heroku, Docker, Kubernetes, GitHub Actions, CI/CD pipelines, DevOps

Tools and Platforms: Git, GitHub, Bitbucket, VS Code, IntelliJ IDEA, Postman, Jira, NPM, Jest, NUnit, xUnit

Methodologies: Agile, Scrum, system architecture, code quality standards, mentoring, technical leadership

EDUCATION

Professional Certificate in Full Stack Web Development | University of Minnesota, 2020

- Intensive program covering JavaScript, React, Express, SQL, NoSQL databases, and Node.js

NOTABLE PROJECTS

- Squigglepig Mobile (2026): Squigglepig Mobile rebuilt the original PWA as a native mobile app using spec-driven development, replacing Socket.io with Supabase Realtime. The structured spec-driven approach produced type-safe, production-ready code deployable to app stores.
- BrewBuzz (2021): Full-stack brewery search application built with React, Node.js, MySQL, and Google Maps API. github.com/rwilliams01101/BrewBuzz
- Squigglepig (2020): Collaborative multiplayer drawing and voting game built with React, Node.js, and Socket.io. github.com/rwilliams01101/Squigglepig
